

**Date:** June 24, 2026  
**Subject:** Monoprost Canadian Backorder Update

---

Attention,

We want to inform you that Théa Pharma Canada will be experiencing a continued backorder of PrMonoprost® due to a supply disruption that is affecting multiple countries globally. We are currently out of stock and actively assessing the situation to confirm a timeline. During this time, Canadian supply of PrMonoprost® will be limited to existing inventory only. Théa Pharma Canada has already taken the following steps:

- Continued to list PrMonoprost® on the Canadian Drug Shortage reporting website
- Updated major Ophthalmology and Optometry Associations
- Updated the relevant Patient Advocacy Groups
- Updated individual Eye Care providers through our Théa Pharma Canada field team

We understand this is a difficult situation for all PrMonoprost® patients and prescribers and assure you that the Théa Pharma team in Canada and Globally are working to resolve it as quickly as possible. We will update this website as the situation evolves.

let's open our eyes
